SMARTROOF®
Roof With A View

for a lifestyle that has never been experienced before

Open up to a whole new world of possibilities with Opening Roof system

Smartroof is a unique roofing system with an array of motorized aluminium louvers that opens up to beautiful blue skies and blurs the boundaries between outdoors and indoors. With the flick of a switch or remote, you can easily control the movement of louvers to any position to let in the brilliant sunshine in winters or welcome shade in summers, while ensuring abundant circulation of fresh air in the entire house at all times. Its rain proof design makes it a brilliant all weather roofing solution, ideal for typical Indian tropical climate.

Precision engineered and elegantly crafted with Australian technology, Smartroof is an inspiration for stylish and an environment friendly addition to the architectural design of any property whether residential or commercial.

Take full advantage of your patio, deck, balcony, courtyard, or terrace with Smartroof and gain valuable stylish and elegant outdoor living space in your home.

This penthouse is blessed with amazing panoramic views of the city of Mumbai. This delightful aspect is unfortunately very exposed to the elements. The sun rays cast over the windows and heat the apartment's interior from early afternoon until the sun sets in the evening. The challenge was finding a suitable product capable of withstanding very high winds and which could offer protection from the harsh sunlight without darkening the interior. The Smartroof system was nominated as the ultimate choice. In fact, architects were highly inspired to design a beautiful outdoor entertaining area around Smartroof much to the delight of the home owners.

With Smartroof opening louvre roof system, you can weather- proof your spa/pool or gym. With louvres that can be adjusted to deal with most weather situations, Smartroof provides unique versatility, allowing you to carry on with your workouts regardless of the weather. In hot weather, the louvres can be adjusted to provide maximum shade depending on the angle of the sun, whilst allowing cooling breezes to circulate. In winters, you can have louvers in 'open' position to enjoy bright sunshine with blue skies above. Having a nice rejuvenating spa treatment under starry sky is yet another possibility in case that holds your

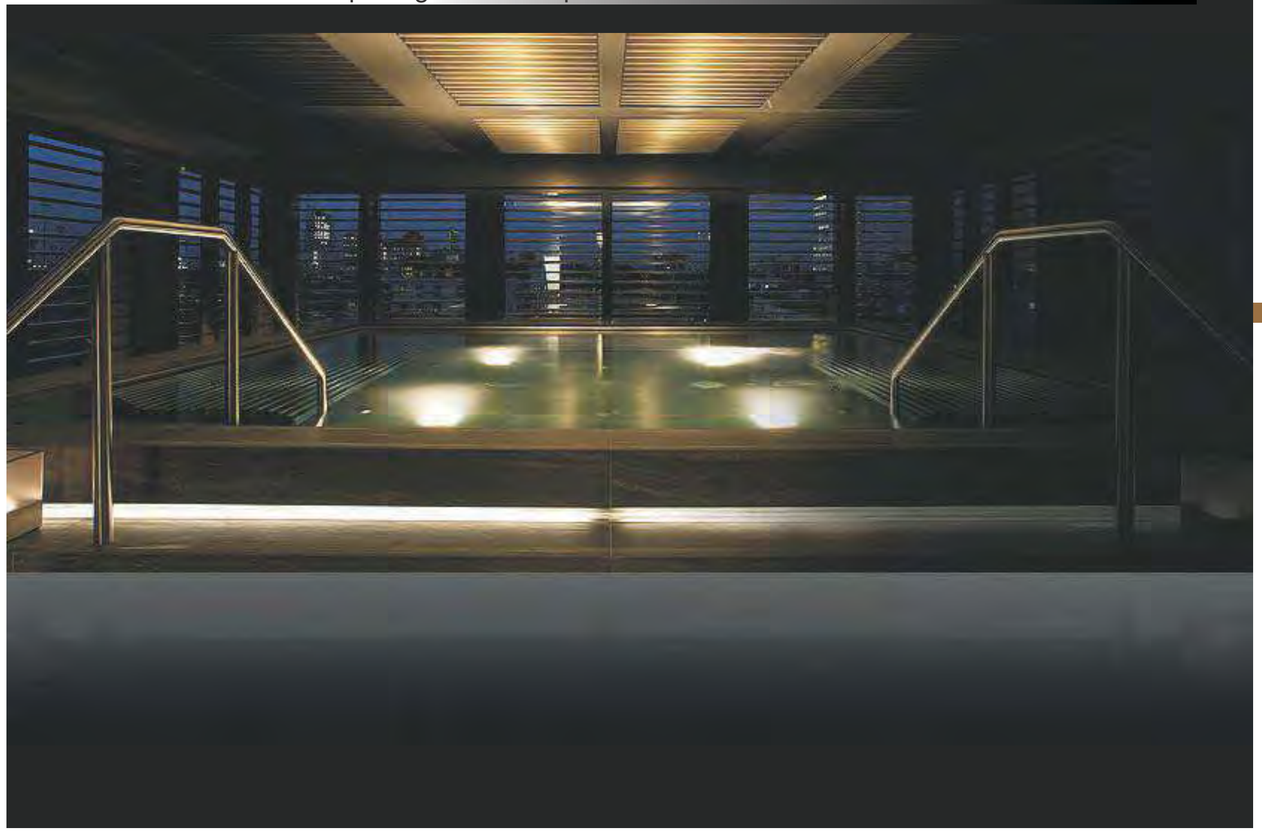
Automated louvered opening roof over spa



Indian architectural fraternity has for long recognized the significance of a Courtyard in Indian homes and the advantages it offers to access natural sunlight and the much needed ventilation in the entire house. To adapt and blend this age old gift of a Courtyard to suit modern living and design style have been a challenge for the designers and architects. Here comes Smartroof – Fully automated louvered opening roof system. By simple flick of a switch or remote, you can easily control the movement of louvers to any angle from 0-180° and lets you control whether you need more of sunlight or less, more breeze or less or make it rainproof, depending upon whether you want more of the outdoors or indoors. Smartroof presents a far superior alternative to commonly used fiber glass / polycarbonate or toughened glass which shuts the air circulation and converts the area below into a virtual hot chamber.

At times, the architects design into their projects operable vertical louvers for privacy and sun screening for homes and also facades of buildings. Comprising precision engineered aluminum louvers having elegant elliptical profile and driven by Somfy motors, Smartroof sun screening system offers an excellent option. Variants include horizontal louvers in vertical plain. The system can further be integrated with BMS where required. Remote control & weather control system complete with rain sensors and sun tracking sensors are available as
